

# 2023 ANNUAL REPORT

**EBM**  
**OFFSHORE**

#### **(h) Intangible assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost, less any accumulated amortization and accumulated impairment losses.

*Software* is recognized at historical cost and is amortized, on a straight-line basis, over its useful life. The useful life of software is generally between 3 and 5 years, dependent on the type of software.

*Research* costs are expensed when incurred. In compliance with IAS 38, development costs are capitalized if all of the following criteria are met:

- The projects are clearly defined.
- The Company is able to reliably measure expenditures incurred by each project during its development.
- The Company is able to demonstrate the technical feasibility of the project.
- The Company has the financial and technical resources available to achieve the project.
- The Company can demonstrate its intention to complete, to use or to commercialize products resulting from the project.
- The Company is able to demonstrate the existence of a market for the output of the intangible asset, or, if it is used internally, the usefulness of the intangible asset.

When capitalized, development costs are carried at cost, less any accumulated amortization and impairment losses. Amortization begins when the project is complete and available for use. It is amortized over the period of expected future benefit, which is generally between 3 and 5 years.

#### **(i) Inventories**

Inventories are valued at the lower of cost and net realizable value. Cost is determined using the first-in first-out method. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and selling expenses. Inventories comprise semi-finished, finished products and the Company's Fast4Ward® Multi Purpose Floater ('MPF') valued at cost, including attributable overheads and spare parts stated at the lower of purchase price or market value. MPFs under construction are accounted for as inventories until they are allocated to awarded projects and then reclassified from inventories to contract assets.

#### **(j) Trade and other receivables**

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within a maximum of 90 days and are therefore all classified as current. Trade receivables are recognized initially at fair value. The Company holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortized cost, using the effective interest method. The Company applies the simplified approach in measuring expected credit losses for trade receivables.

Other receivables are recognized initially at fair value and subsequently measured at amortized cost, using the effective interest rate method. Interest income, together with gains and losses when the receivables are derecognized or impaired, is recognized in the income statement.

#### **(k) Impairment of finance lease receivables**

For finance lease receivables, the Company assumes that the credit risk has not increased significantly since the initial recognition if the finance lease receivable is determined to have a low credit risk at the reporting date (i.e. the Company applies the low credit risk simplification). As a result, if the finance lease receivable is determined to have a low credit risk at the reporting date, the Company recognizes a 12-month expected credit loss.

#### **(l) Cash and cash equivalents**

Cash and cash equivalents consist of cash in bank and in hand fulfilling the following criteria: a maturity of usually less than three months, highly liquid, a fixed exchange value and an extremely low risk of loss of value.

#### **(m) Share capital**

Ordinary shares and protective preference shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.
