Interest rate swaps

Gains and losses recognized in the hedging reserve in equity on interest rate swap contracts will be continuously released to the income statement until the final repayment of the hedged items (please refer to note 4.3.22 Equity Attributable to Shareholders).

Forward currency contracts

Gains and losses recognized in the hedging reserve on forward currency contracts are recognized in the income statement in the period or periods during which the hedged transaction affects the income statement. This is mainly within twelve months from the statement of financial position date, unless the gain or loss is included in the initial amount recognized in the carrying amount of fixed assets, in which case recognition is over the lifetime of the asset. If the gain or loss is included in the initial amount recognized in the carrying amount of the cost incurred on construction contracts, the recognition is over time.

Commodities

Gains and losses recognized in the hedging reserve on commodity contracts are recognized in the income statement in the period or periods during which the hedged transaction affects the income statement. If the hedged transaction subsequently results in the recognition of non-financial assets (such as inventory, asset under construction) or non-financial liability, the gain or loss is included in the initial cost or other carrying amount of the asset. In such case, this amount is recognized in profit or loss at the same time as the hedged item affects profit or loss.
